

Description

Can you get the flag? Go to this [website](#) and see what you can discover.

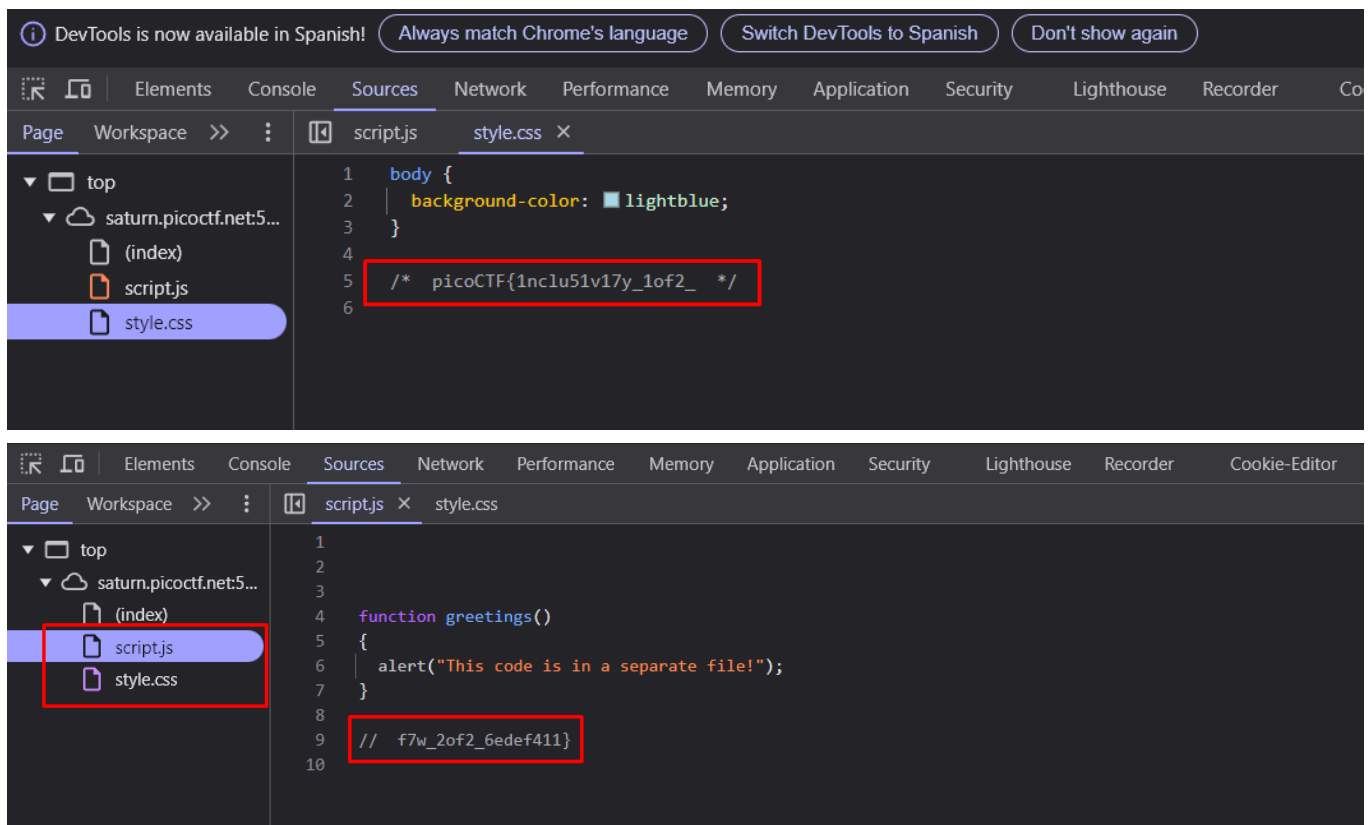

Hints

- Is there more code than what the inspector initially shows?

Solución

The image shows two screenshots of a web browser displaying a website. The website has a light blue background and the title "On Includes". The text on the page reads: "Many programming languages and other computer files have a directive, often called include (sometimes copy or import), that causes the contents of a second file to be inserted into the original file. These included files are called copybooks or header files. They are often used to define the physical layout of program data, pieces of procedural code and/or forward declarations while promoting encapsulation and the reuse of code." Below this text is the source: "Source: Wikipedia on Include directive". At the bottom of the page is a button labeled "Say hello".

The top screenshot shows the button as a simple text input. The bottom screenshot shows the button with a red border and a red arrow pointing to it, indicating it is the target of the solution. A dark overlay box in the bottom right corner of the browser window reads: "saturn.picoctf.net:54712 dice This code is in a separate file! Aceptar".
